

customer to concession
is a one and only one
relationship because
their can only be one
customer_id per
transaction

concession -> customer
is zero to msny because
the customer can have
zero or many
tranactions

customer -> ticket is
one or many because
because they're can be
multiple tickets they buy
in one transaction but
they're all bought by the
same person

movies -> ticket is a one
or many relationship
because many tickets
can be bought for the
movie

reciept has a
relationship of one or
many between ticket
and concession
because you need to
have one to start of the
relationship and you
have multiple
tranactions as you
proceed
